## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishitani et al (Nishitani) 4,379,338.

Nishitani digital filter includes an addition circuit (e.g. adder 5 of Fig. 2) whose result is checked for overflow by an overflow detection circuit (overflow detector 4, 1, 2 and 3 of Fig. 2) and when a positive or negative overflow occurs the result is set to the maximum or minimum, respectively (note the outputs 9 and 10). Relative to claim 3 the setting to the maximum or minimum is rounding.

### *Claim Rejections - 35 USC § 112*

3. Claims 8-13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Lines 3-4 of claim 8 and 9 are mis-descriptive because the overflow detecting circuit does not comprise a logical inversion circuit that inverts the carry signals, note Figs. 5-7, 9, 10

and 12. The elements of claim 10 fail to be clearly related to the elements of claim 4. Similarly note claims 11-13.

***Allowable Subject Matter***

4. Claims 4-7 and 14-45 are allowed.
5. Claims 8-13 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

***Specification***

6. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
7. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

***Drawings***

8. It appears that Fig. 37 should be labeled "Prior Art".

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
